📄 EXPERIENCE

Full Stack developer ● **DS Website**　2018 - now

Work as a freelancer, mainly with outsourcing companies and individual clients.

Working on:

Work in big international company Durex

A transport company management application enables easy and efficient management of transportation operations such as registering orders, planning routes and shipments, tracking cargo, and managing vehicle fleets.

The employee security management application is a tool for easy and effective management of a security team. It allows for task assignment, scheduling, and real-time work monitoring. It also enables communication between employees and the transmission of important information. With this app, it's easier to monitor duty execution and maintain a high level of safety.
